topology and the discrete topology. (b). Lemma 1. If  $(X, \tau)$  and  $(X, \tau_0)$  are compact Hausdorff spaces then either  $\tau$  and  $\tau_0$  are equal or not comparable. Proof. If  $(X, \tau)$  compact and  $\tau_0 \subseteq \tau$  then the identity map  $(X, \tau) \rightarrow (X, \tau_0)$  is a bijective continuous map, hence a homeomorphism, by theorem 26.6. This proves the result. Finally note that the set of topologies on the set  $X$  is partially ...

11th December 2004 Munkres §25 Ex. 25.1.  $\mathbb{R}$  is totally disconnected [Ex 23.7]; its components and path components [Thm 25.5] are points. The only continuous maps  $f : \mathbb{R} \rightarrow \mathbb{R}$  are the constant maps as continuous maps on connected spaces have connected images.

Topology In mathematics, topology from the Greek  $\tau\omicron\lambda\omicron\upsilon\sigma$ , place, and  $\mu\omicron\tau\omicron\varsigma$ , study is concerned with the properties of space that are preserved under continuous deformations, such as stretching, twisting, crumpling and bending, but not tearing or gluing.

The Metric Topology (cont.) 1 Section 21. The Metric Topology (Continued) Note. In this section we give a number of results for metric spaces which are familiar from calculus and real analysis. We also give a couple of examples of nonmetrizable spaces. Note. The following theorem shows that the usual definition of continuity is equivalent to our definition of continuity in terms of inverse ...
